PROJECTS

Bus Booking System | Apr 2026 - May 2026 | [Link](#)

- Created a bus booking website for 500+ users that lets them search routes and pick seats easily.
- Used MongoDB to make sure seat bookings are accurate and prevent two people from booking the same seat.
- Made a simple admin dashboard for the bus company to update their schedules and bus info instantly.
- Connected Stripe for safe payments and added automated emails so users get their tickets right after booking.

AI-Expense Tracker | Mar 2026 - Apr 2026 | [Link](#)

- Fashioned a finance dashboard for 300+ users to monitor expenses with clear visual charts.
- Interfaced with AI services to categorize spending automatically, saving users time on manual entry.
- Standardized data storage for recurring transactions, helping users track their monthly budget accurately.
- Facilitated secure account access with JWT, ensuring user financial records remain private.

Fitness AI-Tracking | Feb 2026 - Mar 2026 | [Link](#)

- Architected a fitness platform that logs daily activity and monitors health metrics for personalized user insights.
- Interfaced with AI-driven models to generate customized workout routines based on individual fitness goals.
- Streamlined user experience by creating an intuitive dashboard that visualizes performance trends and recovery data.
- Configured secure data storage to maintain user privacy, ensuring health records are protected and easily accessible.

Healthcare Platform | Oct 2025 - Dec 2025 | [Link](#)

- Built a healthcare platform to manage patient records, appointments, and prescriptions for 1,000+ users.
- Enabled real-time doctor-patient video consultations using WebRTC and processed payments via Stripe.
- Reduced missed medications by 15% through automated SMS and email reminder workflows.
- Secured all API endpoints with JWT and RBAC using Express.js and MongoDB.

Grocery E-commerce Website | Sept 2025 - Oct 2025 | [Link](#)

- Designed a scalable grocery e-commerce platform with secure JWT authentication for 500+ users.
- Processed 100+ test transactions end-to-end by integrating Stripe for cart and checkout flows..
- Enhanced product discovery by implementing dynamic search and filtering via API-driven rendering.
- Constructed a centralized admin console to manage inventory, monitor order status, and update product listings.
